1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2,8,26,27 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sarring (3,722,336) in view of Pizzorno (4,860,320).

Sarring shows most of the recited limitations including;

A three-side trimmer comprising:

a common support frame (see figure 2),

first and second cutting stations (1211,1212) each with a cutting unit including a cutting strip (1436 of figure 35, note lines 63,64 of column 39) and a knife (1491 of figure 35) for an oblique swing cut (figure 34) against a respective said cutting strip (1436, See note 1 below);

said each cutting unit including a unit frame (1211,1212) connecting said respective cutting strip (1436) to a respective said knife (obviously mechanically connected as see in figure 34),

said each cutting unit being movably mounted as a unit on said common support frame (lines 25-27, column 41).

In regards to claim 27, Sarrings shows tables (inner parts of 1436) and pressing elements (1430).

In regards to claim 34, Sarring shows a third unit frame (765) with it's own cutting pair.

Sarring does not have a drive unit mounted to each unit frame. However, within the art of laterally adjustable cutters for trimming edges, Pizzorno shows that this is well known (96,98). It would have been obvious to one of ordinary skill in the art to have modified Sarring by providing a drive unit for each unit frame, as taught by Pizzorno, so that the unit frames could be moved more easily without having to deal with the linkages to the power drive.

3. Claims 2,3,8,20,21,26,27 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sarring (3,722,336) in view of Pizzorno (4,860,320), as set forth above, and further in view of Geiser (4,615,249).

Sarring, as modified above, shows a trimmer with all of the recited limitations except the cutting is by shearing instead of by a squeeze cut. However, Geiser shows that it is well known for three-knife signature trimmers to make a squeeze cut (figures 2,3). It would have been obvious to one of ordinary skill in the art to have made Sarring's cutters a squeeze cut, as taught by Geiser, since they are an art recognized equivalent known for the same purpose.

4. Claims 14,23-25 and 29-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth E. Peterson whose telephone number is 571-272-4512. The examiner can normally be reached on Mon-Thur, 7:30-4:30.
